The way you're getting your bounds isn't a useful way to do things. You've picked the two very smallest terms of the expression to add together; on the other end of the binomial expansion, ...

What do you call numbers such as \$100, 200, 500, 1000, 10000, 50000\$ as opposed to \$370, 14, 4500, 59000\$ Ask Question Asked 14 years ago Modified 9 years, 7 months ago

I would like to find all the expressions that can be created using nothing but arithmetic operators, exactly eight \$8\$s, and parentheses. Here are the seven solutions I've found (on the Internet)...

1 the number of factor 2's between 1-1000 is more than 5's.so u must count the number of 5's that exist between 1-1000.can u continue?
