The surge to 100kW+ per rack represents both evolution and revolution in data center infrastructure.6 Traditional racks designed for 5-10kW loads cannot safely support modern ...

Built with high-quality photovoltaic panels, the system provides reliable 100KW output while incorporating robust storage capabilities to ensure consistent power availability.

These next-gen data centers boast an astonishing power density of up to 100kW per rack, a significant leap from the traditional 3kW to 20kW in legacy data centers.

We offer five basic topological units, allowing you to customize and configure your data center according to your unique requirements. Enclose up to ten racks with a 100kW capacity, and ...
