---

The 12V DC output wiring does not require over-current protection because the Converter/Charger limits current output. However, all electrical connections need to comply ...

Easily uses the same space as your existing 12V battery and replaces lead acid, AGM or Gel battery applications in RVs, boats, commercial vehicles, off grid back up power and much ...

In the Storage mode, float voltage is reduced to 2.2V/cell (13.2V for 12V battery) to minimise gassing and corrosion of the positive plates. Once a week, the voltage is raised back to the ...
