What is solar battery storage?

Solar battery storage isn't just about backup power - it's about energy independence, savings, and resilience. Here's what to keep in mind:

What batteries do I need for my solar system?

We have 24V and 48V lithium solar batteries to fit you with the right system for your solar application! BigBattery provides lithium-ion battery packs that are perfect for powering any off-grid solar application. Browse our products today to find what you need.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

Is solar battery storage right for You?

This is the magic of solar battery storage - an increasingly popular choice among homeowners in the U.S. As energy expenses continue to rise and power interruptions become more common due to harsh weather, solar storage systems are not just smart, they're your ticket to freedom from the grid.

Today's gold standard for solar containers. Why it's a favorite: This battery is a workhorse. It's very stable, tolerant of high temperatures, ...

Housed in a durable dual-wall container, it ensures long-lasting performance, low maintenance, and reliable power output, making it an ideal solution for off-grid solar applications.

As intermittent renewable power sources, such as wind and solar, provide a larger portion of New York's electricity, energy storage systems will be used to smooth and time-shift renewable ...

Think of a solar battery storage system as a personal energy bank. It's like a big battery that keeps all the extra power your solar panels make. Instead of giving away that ...
