---

Chinese PV module manufacturer Trina Solar has received the green light from the Victoria government in Australia to build a 500MW/1,000MWh battery energy storage ...

Australia has an abundance of solar energy resource that is likely to be used for energy generation on a large scale. [11] The combination of Australia's dry climate and latitude give it ...

The project will involve the construction of a 500MW-scale testing platform and a 1.5GW photovoltaic development pipeline, aimed at reducing the levelized cost of electricity ...

The Tallawang project, located near Gulgong in New South Wales, will combine a 500 MW solar park with a DC-coupled 500 MW/1 GWh battery energy storage system (BESS). ...
