Can shipping containers be used for fire training?

Our containers can easily be customized and redesigned to serve as fire training structures and first-responder training facilities for practice drills. Choosing shipping containers for these structures is a simple way to cut down on the cost of construction without sacrificing durability.

What is a firefighter storage container?

Portable storage containers are ideal structures for fire departments to conduct firefighter training. Shipping containers are highly versatile and customizable, allowing fire departments to stack storage units on top of one another to create any number of unique building designs.

What size shipping container for firefighter training?

Shipping containers for firefighter training are normally 40-foot containers, but you can also utilize 20-foot containers if you prefer a smaller structure. Many fire departments choose to stack and weld 40-foot containers on top of one another to create multi-story buildings with multiple corridors, rooms, and windows.

Why did the fire department use a shipping container complex?

The fire department wanted to use a shipping container complex, as these facilities allow firefighters to better train in real-life scenarios with the necessary safety guards in place.

Why Are Shipping Containers Used For Firefighter Training? Benefits Size and Layout Options Examples in Action Compare Prices Related Articles Portable storage containers are ideal structures for fire departments to conduct firefighter training. Shipping containers are highly versatile and customizable, allowing fire departments to stack storage units on top of one another to create any number of unique building designs. By doing this, fire departments can simulate ...
