"Now small base stations, some people also call them distributed base stations. In the 5G era, the RF part and the antenna part will be more and more integrated.

Thus, telecom sites must be accurately re-designed, starting from the power supply units (PSUs), which will be replaced by new ones with higher output power and typically higher ...

The deployment of next-generation networks (5G and beyond) is driving unprecedented demands on base station (BS) power efficiency. Traditional BS designs rely h

In this blog post, I'll share my insights on how to design a Telecom PSU that meets the demands of 5G applications. 5G technology is characterized by its high data rates, low ...
