---

A high-voltage Battery Management System (BMS) is an intelligent electronic control unit designed to monitor, protect, and optimize the performance of battery packs ...

My project targets a BMS that supports both 400V and 800V battery packs, offering flexibility for applications ranging from EVs to large-scale energy storage.

A battery management system (BMS) is essential for the safe and efficient control of modern energy storage systems in electric and hybrid vehicles.

View the reference design and schematic for 800 V Battery Management System (BMS) Reference Design based on NXP Design. And find the design parts at Avnet Americas.
