What services do cement plant operators need?

Services are crucial in keeping a cement plant running over decades. Fast and uncomplicated support, state-of-the art solutions and a partner with the required expertise - that is what cement plant operators are looking for. And we offer all that it takes to meet these requirements: Asset management.

What is engineering design of cement plant systems?

The engineering design of cement plant systems is the core business of PENTA. PENTA is composed of a highly experienced multi-disciplinary team covering all phases of the engineering process for cement plant projects.

What auxiliary equipment is used in a cement plant?

Cement grinding mill: our cement mill is widely applied to dry or wet cement grinding units, it can be used as a raw material mill, and also applies to cement grinding plants. Auxiliary equipment: there are many auxiliary cement equipment items in the cement plant, they play their own roles in every section.

What are the different types of cement plant equipment?

AGICO supplies cement crusher, cement rotary kiln, cement ball mill, vertical cement mill, preheater, and other related cement plant equipment. Raw material preparation: Raw materials are crushed to the required sizes using various types of cement crushers. Clinker plant: cement kiln process the cement raw material into cement clinker.

The primary goal of our comprehensive After-Sales-Service is to keep your plant up and running at peak performance - so you can produce consistent high quality concrete.
