Oslo's recent deployment of a 120MW all-vanadium liquid flow energy storage system isn't just another pilot project - it's answering questions we've been avoiding since the Paris Agreement.

The results showed that the battery stack had no internal or external leakage, and had the characteristics of low internal resistance, high insulation, high electrical density, and ...

Located in the Hongqiqu Economic and Technological Development Zone in Linzhou, the project spans approximately 143 acres. It includes the construction of a ...

Europe's largest vanadium redox flow battery -- located at the Fraunhofer Institute for Chemical Technology -- has reached a breakthrough in renewable energy storage, ...
