Are low-voltage switchboards vulnerable to arc flashes?

The provision of reliable power in such buildings is reliant upon the low-voltage distribution switchboards that lie at the heart of the electrical installation. Demands placed upon these switchboards, particularly as operations and infrastructures expand over time, leave them vulnerable to arc flashes.

What is arc flash rated?

Arc flash rated to 10.1 cal. Perfect solution for electricians that require a light-weight arc flash suit for long wear times and for applications requiring high protection level and mobility. This storage bag with drawstring is made to fit an arc flash hood or face shield with an attached hard cap.

Is nVent arc-resistant switchgear ANSI compliant?

Offering an industry-leading, low-profile design that is Type 2C (2BC) compliant, nVent arc-resistant switchgear options meet or exceed IEEE, ANSI and NEMA requirements. Available in a wide range of ANSI ratings and configurations, our switchgear features utility-grade, welded, metal-clad assembly for reliability, safety and long service life.
