primary energy supply. Energy trade includes all commodities in Chapter 27 of the armonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end

In June the provinces of Upper Austria (433 GWh) and Carinthia (347 GWh) generated the highest energy surplus and made it available throughout Austria via the APG grid.

For the first time, an analysis shows how much storage capacity Austria needs on its path to 100% renewable electricity by 2030 ...

Energy in Austria describes energy and electricity production, consumption and import in Austria. Austria is very reliant on hydro as an energy source, supported by imported oil and natural gas ...
