Discharge Balancing: In discharge balancing, higher-voltage cells are selectively discharged to match lower-voltage cells. This process is often coordinated during the charging phase to ...

In this study, a dual DC-DC converter based active cell balancing topology is proposed with reduced number of active components and power switches.

Learn how battery balancing improves performance, safety, and lifespan. Explore key techniques, benefits, and the science behind balancing ...

To validate the efficacy of the novel SoP-based cell equalization algorithm, a simulation is conducted in which a Li-ion battery ...
