Our offices are located in St. Philip Barbados. A solar panel is a device which is used to convert energy contained within the sun's rays into electricity. The off-grid solar electric systems ...

There are different types of inverters, including string inverters, microinverters, and power optimizers, each with its own advantages depending on the specific setup and energy needs.

Generally speaking, a solar inverter is a type of electrical converter that converts the variable direct current (DC) output of a solar panel into a utility frequency alternating current (AC) that ...

We work closely with manufacturers of inverters to improve their products' efficiency in order to make the products more marketable and attractive to those interested in solar power. Solar ...
