The Beijing Qunling Energy Storage Power Station utilizes state-of-the-art battery technologies, particularly advanced lithium-ion ...

As the world's largest energy consumer, China is building a smart energy network where storage systems act like giant "power banks" balancing supply and demand.

The world's largest "water battery" is fully up and running. The Fengning Pumped Storage Power Station, located just north of Beijing, is fully operational as of the start of 2025. ...

Beijing advances demonstrations in user-side energy storage--such as thermal storage, smart microgrids, and direct green power supply--to data centers aiming for 100% green electricity ...
