---

Belarus is still in the early stages of deploying wind, solar PV and biogas, although the technologies used in their development are considered mature and meet international standards.

olar potential of Belarus. As of 2021 there is little use of solar power in Belarus but much potential as part of expansion of renewable energy in Belarus, as the country has few fossil fuel ...

In June 2016, a solar farm in the Molodechno area with a capacity of 5.7-5.8 MW was launched - more than any of the previous ones, not only in Belarus, but also in Estonia, Lithuania, Latvia and Poland. In August of that same year, the Solar II farm was opened in Bragin District, more than three times its predecessor's capacity. In 2017, about 30 photovoltaic power plants with a total capacity of about 41 MW were used. In the same year, the largest photovoltaic farm in Rechytsa, ...

The report provides a comprehensive analysis of the historical development, the current state of solar power installation scenario, and its outlook.
