Will China remain the primary supplier of EV and Bess batteries?

That means that even if pockets of rival battery production emerge in the coming years, China will likely remain the primary vendor for EV and BESS batteries for years to come. The opinions expressed here are those of the author, a columnist for Reuters. Enjoying this column?

Which states are investing in battery energy storage systems?

Other states in the US are also investing in battery energy storage systems with Texas and Arizona set to record the biggest growth, increasing the nation's battery output 10-fold to 16,000 megawatts. China is also spearheading the charge for BESS.

Is 5MWh a standard for higher energy density containerised Bess?

While over the past year or so the industry had begun to converge around 5MWh as a sort of standard for higher energy density containerised BESS, CATL--and some others, including EVE Energy--have launched systems that go beyond that.
