In aquaculture, research should cover sustainable methodologies like integrated multi-trophic aquaculture, alternative feed sources, and the scalability, cost-effectiveness, and ...

This study has investigated a sustainable energy model for a small-scale shrimp farm in western Taiwan with synergies for the dual use of the water area for solar photovoltaic ...

This dual-purpose use of space boosts the efficient utilisation of land and water, reduces evaporation, and provides a stable energy supply for aquaculture operations.

This study has investigated a sustainable energy model for a small-scale shrimp farm in western Taiwan with synergies for the dual use ...
