---

SureSine line uses industrial-grade build quality throughout, with models built around premium toroidal transformers for improved sinewave stability. Designed for the most demanding off ...

A new method for the design of a bidirectional inverter based on the sinusoidal pulse-width modulation principle and the use of a low ...

Advanced SPWM modulation technology with pure sine wave output and high power quality. High power density and long life devices are selected to support long term operation at ...

This reference design provides an overview on how to implement a bidirectional three-level, three-phase, SiC-based active front end (AFE) inverter and power factor correction (PFC) stage.
