The aim of this article is to present an energy plan for Guinea-Bissau based on the OMVG transmission network in the country and the integration of a photovoltaic plant at the ...

The proposed project will combine wind, solar, battery energy storage and green hydrogen to help local industry decarbonise. It includes an option to expand the connection to 1,200MW. [pdf]

This work studies the implementation of an isolated microgrid activated with photovoltaic energy and energy storage in batteries under the case study of the community of Bigene, located in ...

Hybrid systems combining solar panels, storage units, and smart inverters are proving particularly effective. One local clinic reduced its energy costs by 68% after installing a 50kWh system ...
