---

Without an inverter, your solar panels produce electricity that your home can't actually use. That's because solar cells generate DC power, while most homes and appliances ...

Solar panels produce electricity as direct current (DC). Almost all household appliances such as fridges, wifi routers and TV's run on alternate current (AC), however. Solar inverters convert ...

In a large-scale utility plant or mid-scale community solar project, every solar panel might be attached to a single central inverter. String inverters connect a set of panels--a string--to one ...

In short, the answer is yes, you can use a solar battery with a normal inverter, but there are some important considerations. Using a solar battery requires a charge controller to ...
