What is a container substation?

An intelligent solution for obtaining direct current quickly and economically is provided by container substations. By integrating the equipment in a modular housing and undertaking rigorous testing off site, Siemens is able to supply fully built and tested modular traction power substations to a consistent and high level of quality.

What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas of high pollution, and humidity. Customers requiring shorter overall delivery times and minimal on-site work have been the main drivers for Hitachi Energy's development of pre-fabricated indoor substations.

How can a container be transported?

The container can be transported by road, rail or water and crane attachment provisions are fitted for loading and unloading. Siemens Mobility continuously improves its components and takes on trends from other industries to bring linked benefits to the rail infrastructure industry.

Supports Multiple Green Energy Sources Integrates solar, wind power, diesel generators, and energy storage systems to achieve an energy-saving solution, with a maximum load capacity ...

All traction power and switching equipment in one container Medium-voltage switchgear Rectifier transformer unit DC switchgear Setup, connect, switch on - ready Digital components, connectivity and digital solutions Station control Technical features station control system Sitras SCSEnergy management system Benefits Asset Monitoring Cloud Connectivity The three-phase AC supply is fed in and distributed via the medium-voltage switchgear. The rectifier transformer unit (rectifier transformer and rectifier Sitras REC) transforms the voltage and frequency of the power supply. DC switchgear Sitras DSG or Sitras CSG distributes the power to the track sections. The Sitras SCS station control system pe... See more on assets.new.siemens
