Will Chile be able to develop energy storage projects in 2024?

In 2022, Chile passed an energy storage and electromobility bill, which made stand-alone storage projects profitable, but the market is still expecting new rules on capacity payment for storage projects, which are to be approved in 2024. Chile has also put in place an auction procedure to award public land for the development of BESS projects.

How many energy storage projects are in Chile?

According to a December 2023 publication on the InvestChile website, the country had 23 approved energy storage projects with a total of 3,000 MW of capacity. Chile is exploring a variety of solutions to keep abreast of the changing energy demand landscape ranging from BESS to innovative projects using CO₂.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

How much battery storage does Chile have?

Chile has an operational installed capacity of approximately 1GW in batteries, and another 3GW is under construction. Battery storage has been largely financed by bank lending in recent years, but we believe larger projects could increase the scope for bond financing.

Since the capacity charge is a fixed amount set every four ...

This article explores the reasons behind high photovoltaic energy storage expenses, analyzes regional trends, and offers actionable solutions for businesses and communities.

This article explores the benefits, challenges, and real-world applications of installing energy storage photovoltaic projects in the region, backed by data and actionable insights for ...

As electricity prices surged 18% year-over-year in 2023, savvy homeowners are seeking home energy storage quotation in Chile to lock in energy independence. But what exactly drives the ...
