Can a hybrid inverter & solar panel survive in the Philippines?

If you live on a coastal island in the Philippines, you've likely seen how quickly salty, humid air damages everyday items--from metal hinges to electronic appliances. The same environment can be tough on a hybrid inverter, batteries, and solar panels, often reducing their expected lifespan.

What is a hybrid solar inverter?

A hybrid solar inverter allows owners of solar photovoltaic (PV) systems to store the surplus energy generated by the solar panels in a battery for later use when there is not enough sun. The inverter can also source power directly from the utility grid when the solar panels are not generating enough power.
