---

We often talk about the base station, which belongs to the radio access network, 5G pre-transmission, intermediate transmission and back transmission are relative to the base ...

5G base station is the core equipment of 5G network, which provides wireless coverage and realizes wireless signal transmission between wired communication network ...

Next, we propose a secure transmission approach that leases the power of 5G BS to interfere with the eavesdroppers, improving the secrecy rate, and then construct an interference power ...

At its core, a 5G base station antenna comprises hardware and software components designed for high-frequency signal transmission. The hardware includes antenna ...
