In dispatching centers it is common for eight or more radio base stations to be connected to a single dispatching console. Dispatching personnel can tell which channel a message is being ...

presents a following method: location selection and network optimization for the wireless communication network. First, it collects the experimental data set of base station locati.

In this study, we proposed the Multimodal Optimal Base Station Selection Network (MOBS-Net), which integrates a real-time base station judgment network with a sequential ...

Abstract: This research focuses on analyzing and predicting traffic and throughput at base stations in cellular networks using machine learning algorithms. The main research ...
