To address the challenges posed by the large-scale integration of electric vehicles and new energy sources on the stability of power system operations and the efficient utilization ...

A California-based startup, ElectricFish, says its electric vehicle (EV) ultra-fast charging station doubles as a community microgrid ...

With its characteristics of distributed energy storage, the interaction technology between electric vehicles and the grid has become the focus of current research

The aim of the project was to optimise the geographical and temporal distribution of surplus energy from renewable energy systems (RE systems) using bi-directional electric vehicles ...
