---

Our BESS Chillers are engineered specifically for containerized and utility-scale storage systems, ensuring safe, efficient, and long-life battery operation even in extreme climates.

The Trane® Thermal Battery air-cooled chiller plant is a thermal energy storage system, which can make installation simpler and more repeatable, saving design time and construction costs.

The system is built with long-life cycle lithium iron phosphate batteries, known for their high safety and durability, making it a reliable choice for renewable energy generation, voltage frequency ...

It is suitable for cooling and heating energy storage batteries, as well as other temperature-sensitive equipment. This model, with functions including host computer communication and ...
