---

Generally, there are a number of fire extinguishing system types for generator rooms, such as the traditional sprinkler systems, combined sprinkler-foam systems, water mist ...

FirePro generators are an all-in-one container and are the equivalent of the agent storage tank, piping and nozzles of a pressurized gas system. They are installed directly within the ...

It is critical to detect and suppress the fire before it spreads. When the Firetrace system automatically detects the fire, it immediately delivers the fire suppression agent. By rapidly ...

However, these openings pose a significant challenge to fire suppression systems that rely on a fully sealed environment for optimal performance. The inability to contain extinguishing agents ...
