What features are included in a canopy & container generator?

As standard our canopies are fitted with corrosion resistant door furniture, high quality locking mechanisms, and internal exhaust systems. Incorporated into all canopy & container generators we add features to ease maintenance, and make life as easy as possible for the operator.

What makes a container genset unique?

Internally every container genset is lined with high quality mineral wool providing the attenuation, faced with corrosion resistant perforated metal. Every container is fitted with an internal lighting and distribution system, and for operator safety every personnel access door is fitted with internal emergency releases.

What are endcave canopy & container generators?

Endcave canopy & container generators have been designed to offer the lowest noise levels, in the smallest footprint, while remaining competitively priced. Every canopy is manufactured from the highest quality materials, and powder coated prior to having its acoustic lining fitted, ensuring longevity once it is in service.

This 1340KW Containerized Silent Diesel Generator is the ultimate power solution for industries requiring a resilient, high-capacity, and low-noise generator set.

Discover our innovative silent containerized generator sets featuring advanced noise reduction technology, intelligent monitoring systems, and comprehensive environmental protection. ...

In this blog post, I will delve into the various aspects of noise reduction technology in containerized generators, exploring the methods and materials used to minimize noise ...

Engineered for reliability and quiet operation, our containerized diesel generators deliver robust power solutions for industrial, commercial, and ...
