How much power does a 2KW Solar System produce?

Our 2 kW solar systems feature DIY solar kits, which will produce at least 2kW (or 2,000 watts) of power. This translates to approximately 175 to 375 kilowatt-hours (kWh) per month depending on your system choice, location and other factors. Choose between a 2kW solar kit with microinverters and a 2.4kW off-grid kit.

How much space does a 2KW Solar System need?

A 2kW solar kit from GoGreenSolar requires about 107 square feet of space. Solar panels with microinverters allow you to place panels in various locations, directions and angles on your roof. This choice will offer you more flexibility if space is at a premium.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

These 2kW off-grid solar packages are perfect for small spaces. Easily expandable with more solar panels and batteries to fit your growing energy needs.

Shop our selection of complete solar kits and bundles for off-grid, hybrid, grid-tie, and mobile solar systems. Choose from top brands like EG4 Systems, Victron Systems, and Schneider Systems.

Fill out the form for a complimentary solar quote that includes a custom satellite layout, system design and a breakdown of total project cost and estimated savings.

2kW solar systems for homes, garages, sheds, or cabins. High-quality complete kits with portable and fixed mounting options for reliable solar energy.
