The platform is placed on floating pillars, which keep the panels dry at 3 metres above the waterline. It resembles an offshore oil platform and is perfectly suited to conditions offshore.

Almost 3,000 solar panels have been installed, including 2,270 on the roof of our enormous Hall 2. The electricity generated by the panels helps to power the lights and equipment in our...

AG Reederei Norden-Frisia has a proven commitment to sustainability in its operations, and the E-Kat ferry is part of a wider programme to achieve zero emissions. The ...

The vessel will be CO₂ neutral when operating and the electricity that charges its batteries will come from onshore solar panels. ...
