Why is Denmark launching a green container ship facility?

This initiative represents a significant step forward in reducing emissions and enhancing sustainable port operations in Northern Europe. The facility, designed specifically for container ships, will mark the first of its kind in Denmark and solidify the Port of Aarhus's commitment to green transformation.

Does powerCON provide shore power solutions for container terminals?

Over the recent years, PowerCon has started to supply shore power solutions for container terminals. Creating a new project named "PowerFlex", PowerCon set out to design and implement low-cost and flexible shore power supply for container ships and include onboard battery charging into the system design.

What is a containership power supply (Ops)?

Containerships rely on the highly pollutant marine fuel to operate, contributing to 50-60% of all ship emissions. Onshore power supply (OPS) is the delivery of shore side electrical power to a ship at berth so its main and auxiliary engines can be turned off.

In the heart of Scandinavia, Denmark's outdoor power supply factories are pioneering advanced energy storage systems tailored for renewable integration and industrial applications. This ...

Once completed, the facility will enable container ships to connect to onshore power, eliminating the need for diesel generators while at berth. This will significantly reduce ...

The Port of Aarhus has an onshore power plant on its way to container ships, which will be the first of its kind in Denmark. And a new agreement stipulates that it must be ...

Creating a new project named "PowerFlex", PowerCon set out to design and implement low-cost and flexible shore power supply for container ships and include onboard battery charging into ...
