The groundbreaking DER and Aggregation Participation Model program allows DERs to be aggregated as virtual power plants (VPPs) to provide both wholesale services to ...

By leveraging SYSO's VDER+DLM optimizer and peak prediction tools, asset owners can unlock the full potential of their storage systems in New York's dynamic energy ...

In 2020 the Federal Energy Regulatory Commission issued Order 2222, requiring grid operators to allow DER aggregations to participate in wholesale markets.

Companies working to deliver VPPs via DERs do so by using an intelligent control system and bidirectional technology to aggregate energy from networked resources at a ...
