Is Djibouti Telecom building a new cable landing station?

Djibouti Telecom has begun construction on a new Cable Landing Station in Djibouti City. The CLS will consist of three floors, with each floor having a 250 square meter (2,690 sq ft) equipment room. The 3rd floor is reportedly reserved for colocation. The facility is expected to be completed by April 2022.

Is Djibouti Telecom creating a digital platform?

Djibouti Telecom, under the direction of its Director General Mohamed Assoweh Bouh, is building a digital platform for the region. Wingu.Africa has partnered with Djibouti ISP TO7 Network to develop a carrier-neutral data center and carrier-neutral cable landing station.

Will Djibouti launch a carrier-neutral data center?

Wingu.Africa, in partnership with Djibouti ISP TO7 Network, is developing a carrier-neutral data center and carrier-neutral cable landing station in Djibouti. Details about the facility weren't shared, but it is expected to be ready for operation in early 2022.

What is Djibouti Data Center SARL?

Djibouti Data Center SARL is a joint venture between Djibouti Telecom and Djibouti Data Center SARL, a group of local and international investors.

The Djibouti Data Center (DDC) is the first and only carrier neutral data center facility in East Africa with access to all major international fibre optic systems connecting Europe, the Middle ...

The DDC leverages Djibouti's strategic position in East Africa as the major meeting point for undersea fiber optic cable systems connecting Europe, the Middle East, and ...

The new Cable Landing Station will be a neutral digital port that will provide an open-access cable landing service to submarine cable operators for a neutral, safe and secure landing in Djibouti ...

While wireless communication has improved drastically over the years, wired connectivity still provides greater capacity, better speeds, and lower latency.
