Solar and wind projects are built much faster than large fossil-energy plants. But the pre-construction approval process can be complex and slow projects down.

Find out how to calculate the payback time for renewable energy with examples of solar and wind installations and their economic advantages.

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of ...

“Within a few months, a wind turbine generates enough electricity to pay back all of the energy it took to build it,” she said. “But some photovoltaics have an energy payback time of...
