What is the TP-Link outdoor wireless base station?

The TP-LINK Outdoor Wireless Base Station pairs professional performance with user-friendly design, making it the perfect solution for both business and home users. Two external RP-SMA antenna interfaces allow the Outdoor Wireless Base Station to integrate seamlessly with TP-LINK's line of sector and dish antennas.

What is a weatherproof outdoor AP?

This fully weatherproof outdoor ap comes with a 2.5G ethernet port with PoE and can reach 1200 Mbps over 5 GHz. You can not only use it as an outdoor access point but also to create a point-to-point wireless network or point-to-multi-point network. With the latter, you have one base station and multiple receivers.

What is a Multitech IP67 base station?

The MultiTech Conduit® IP67 Base Station is a ruggedized IoT gateway solution, specifically designed for outdoor LoRa®; public or private network deployments. The highly scalable and certified Conduit IP67 gateway is capable of resisting the harshest environmental factors including moisture, dust, wind, rain, snow and extreme heat.

Can you use an outdoor wifi AP outside?

Exterior walls and glass are great at blocking wifi signals, so to solve this you really have to place an access point outside. An outdoor ap can also be used to extend your wireless network into your garage or outbuilding that you might have. They can be used to create a wireless bridge between two buildings.
