Based on the above anti-backflow control principle, it is necessary to first detect the reverse power at the grid connection point and then send a control signal through the RS485 ...

Due to the increasing numbers of photovoltaic (PV) systems installed at the low-voltage (LV) level, reverse power flow (RPF) between the \$L V\$ and the medium-voltage (MV) level is becoming a significant issue.

The invention discloses an anti-reflux control device and a photovoltaic energy storage connecting grid power generation method thereof.

This paper aims to explore recourses to modify the existing protective schemes and investigate reverse power relay (RPR) operation against bi-directional power flow to accommodate PV ...
