To address this challenge, an optimized energy management strategy (EMS) is required to balance user demands with grid requirements effectively.

To address this issue, this paper proposes a power allocation strategy based on dynamic parameter adjustment. The proposed strategy combines peak output and game theory to ...

Acumen EMS offers a powerful solution for managing demand charges through advanced analytics, real-time monitoring, and automated optimization.

This EMS not only caters to the charging demands of EV owners and achieves power allocation for smooth load leveling but also leverages simulated EV charging loads from ...
