Over the next decade, Europe's electrochemical energy storage market is poised for dramatic growth, reshaping how we power our homes, businesses, and industries.

Europe reached 89 GW of installed energy storage capacity by the end of 2024, with pumped hydro accounting for 53 GW of it, according to a report by the European Association ...

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy ...

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. ...
