---

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination.

This marks the first increase in FOB China module prices, following upstream price gains that began in the first week of July amid government intervention.

They are adjustments to China's tax rebate policies for export projects, a slight increase in module prices due to policy changes in China, and the depletion of older inventory ...

Solar (photovoltaic) panel prices This data is expressed in US dollars per watt, adjusted for inflation.
