o Per T/CEC 373-2020, battery containers should be arranged in a single-layer configuration. o Without a firewall, the fire separation should be at least 3 meters (long side) ...

Adequate spacing of battery racks or containers won't prevent a fire, but will keep losses to a minimum. There is currently no industry standard for the correct spacing, but based on ...

For more information on the roadmap, research groupings, and specific topic details, the full, expanded Battery Storage Fire Safety Roadmap is below in the appendix.

There are no proven methods to extinguish lithium-ion battery fires, so controlled burning and separation distances are recommended to ...
