China has connected its first large-scale, grid-connected flywheel energy storage system to the power grid in Changzhi, Shanxi Province.

A grid-scale flywheel energy storage system is able to respond to grid operator control signal in seconds and able to absorb the power fluctuation for as long as 15 minutes.

FESS is an electromechanical energy storage system that comprises of an electrical machine, a back-to-back converter, a DC link capacitor, and a large disc that can ...

Our flywheel containers are equipped with multiple flywheels on the Storepower mounting system, auxiliary systems for ease of operation, energy storage control and an electrical cabinet. We ...
