---

The flywheel is the thickest at these points and can take a hit from a punch if common sense is applied. I have done it so I know it works. If it didn't have a puller to get at ...

I understand how a clutch can separate the flywheel from the clutch disk so that power is disconnected from the engine. When that happens, does the input shaft (along with ...

Saw a video last night of someone "referencing " another video about someone removing a flywheel the toolless way, hammering it off with a hammer and punch. Said it ...

Most saws run 0.010 - 0.012, that is 10 to 12 thousand clearance between the coil and flywheel magnets, a business card is very close in thickness and that is what many use for ...
