How many battery storage systems were installed in Germany in 2024?

Almost 600,000 new stationary battery storage systems were installed across Germany in 2024, increasing the country's storage capacity by 50 percent year-on-year, according to preliminary data from the German Solar Industry Association (BSW Solar).

How many battery storage systems are there in Germany?

According to preliminary numbers from the German Solar Industry Association (BSW Solar), there were 1.8 billion installed battery storage systems in Germany at the end of last year. They had a capacity 19 gigawatt hours (GWh), enough to cover the daily electricity consumption of two million two-person households.

What if a battery storage project was approved in Germany?

If only half of these projects were approved, they would store enough energy to power 30 million German households for one day. Battery storage is needed to supplement the country's rapid rollout of renewable energy installations, which reached a new record share in electricity production of 55 percent in 2024.

Can Germany use solar energy?

However, renewable energies come with a catch: Due to a lack of storage capacity, Germany cannot fully leverage the potential that solar energy offers. During sunny and windy phases, wind and solar park operators have to throttle or even shut down their systems repeatedly to avoid overloading the power grids.

Construction of Germany's largest battery storage facility to date is set to begin in Förderstedt, Saxony-Anhalt, on November 4, 2025.

Eco Stor GmbH has officially switched on what is now Germany's biggest standalone battery energy-storage system, following a ribbon-cutting ceremony on ...

Unser Mobile Power System ist eine containerbasierte Stromversorgungsanlage, die Solarmodule, einen Lithium-Ionen-Batteriespeicher und ein Notstromaggregat als 24/7-Backup ...

Almost 600,000 new stationary battery storage units were installed last year. That amounted to an annual increase of just under 50 ...
