I assume this has been discussed already in this forum but I wasn't able to find a recent thread. NEC 2023 210.8(A)(6) requires all 125-250V single phase receptacles in a ...

But since its on a GFCI, if the frame provides a decent path back to the panel, that's a separate neutral path and will cause the GFCI to trip. Removing the jumper removes the ...

The NEC expanded GFCI protection for dwelling units with basements both finished and unfinished. With considerable urging by manufacturers. -Hal

Rcd Rcd A GFCI breaker typically is part of a load center or panelboard system. 5ma is for personnel protection, other ma trip values are available for equipment protection ...
