---

Although curved graphene prevents the agglomeration of graphene sheets, supercapacitors have lower energy densities than batteries due to their different charge ...

Graphene hybrid made from metal organic frameworks (MOF) and graphenic acid make an excellent positive electrode for supercapacitors, which thus achieve an energy ...

Graphene-based supercapacitors can store almost as much energy as lithium-ion batteries, charge and discharge in seconds and maintain these properties through tens of thousands of ...

Although curved graphene prevents the agglomeration of graphene sheets, supercapacitors have lower energy densities than ...
