Government analysts expect prices will continue to rise and outpace inflation in 2026. With household earnings basically flat when adjusted for inflation, these increases hit ...

Electricity prices are rising more than twice as fast as overall inflation. That's especially costly during the dog days of summer when air conditioners are working hardest.

Prices and procurement times for essential components like power transformers and cables have almost doubled in four years, creating significant hurdles for grid developers.

This 11-page report finds that grid-forming inverters cost c\$100/kW more than grid-following inverters, which is inflationary, but integrate more renewables, raise resiliency and ...
