What makes IPS the largest capacity provider in Guatemala?

Modernize. Empower. This is how IPS serves as the largest capacity provider for Guatemala, staying committed to creating efficiencies and pushing sustainability at every turn. In 2021, International Power Services acquired legacy plants in Esquintla and Puerto Quetzal.

What type of power plugs are used in Guatemala?

In Guatemala, power plugs and sockets (outlets) of type A and type B are used. The standard voltage is 120 V at a frequency of 60 Hz. For more information, select the country you live in at the top of this page. We don't sell power plug adapters. We refer you to Amazon, where you will find a great selection of travel adapters.

How much power does IPS Guatemala have?

IPS Guatemala has a generating capacity of 460 MW through our assets across Puerto Quetzal and Esquintla. Discover the plants and barges that power the people of Guatemala every day. Guatemala is one of the most beautiful countries in the world, and we strive to keep it that way.
