---

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

The company's recent production milestone with the Powerwall 3 is not just a technological achievement; it underscores Tesla's potential to redefine how energy is ...

There are several categories of energy storage systems, either currently in production for residential use, or in some level of testing for eventual home placement.

Powerwall is a home battery that provides whole-home backup and protection during an outage. See how to store solar energy and sell to the grid to earn credit.
